Width	Between 15 to 200 cm	Between 15 to 200 cm
Length	Between 3 to 250 meters	Between 3 to 250 meters

COLORED BUBBLE WRAP FILM

FULL PROTECTION

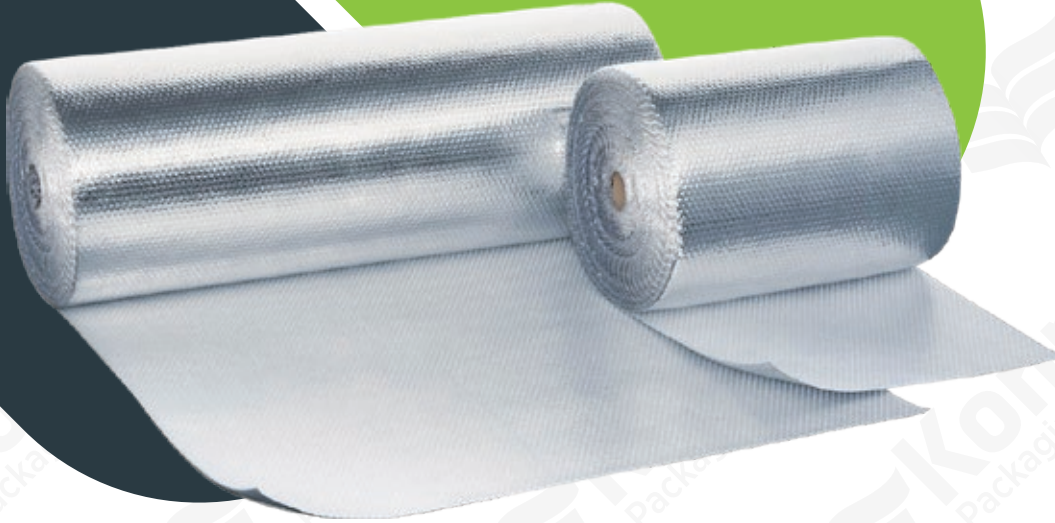

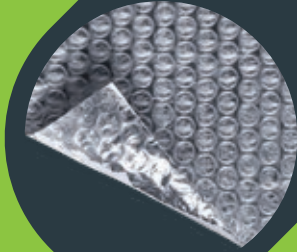

TECHNICAL DETAILS

Bubble Diameter	10 mm Bubble	30 mm Bubble
Bubble Height	3,5 mm	10 mm
Micron	Between 10 to 300 µm	Between 100 to 350 µm
Width	Between 15 to 200 cm	Between 15 to 200 cm
Length	Between 3 to 250 meters	Between 3 to 250 meters

By adding colored additives, our film can be produced in almost any color. The colored bubble wraps are mainly used for product labeling or advertising purposes and are an excellent addition to our product range.

FULL PROTECTION

ALUMINUM LAMINATED BUBBLE WRAP FILM

The aluminum-laminated bubble film (P-Alu) is a very special film that offers special additional protection in addition to the well-known properties of the padding. It is therefore very suitable for insulation.

TECHNICAL DETAILS

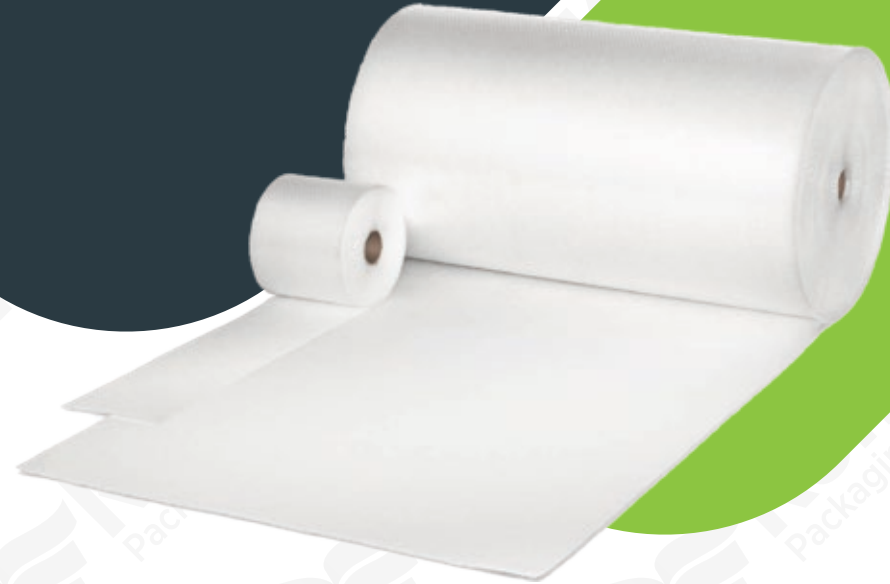

Bubble Diameter	10 mm Bubble	30 mm Bubble
Bubble Height	3,5 mm	10 mm
Micron	Between 10 to 300 µm	Between 100 to 350 µm
Width	Between 15 to 200 cm	Between 15 to 200 cm
Length	Between 3 to 250 meters	Between 3 to 250 meters

PE FOAM LAMINATED BUBBLE WRAP FILM

FULL PROTECTION

TECHNICAL DETAILS

	10 mm Bubble	30 mm Bubble
Bubble Diameter	10 mm Bubble	30 mm Bubble
Bubble Height	3,5 mm	10 mm
Micron	Between 10 to 300 µm	Between 100 to 350 µm
Width	Between 15 to 200 cm	Between 15 to 200 cm
Length	Between 3 to 250 meters	Between 3 to 250 meters

The PE foam laminated bubble wraps from the Sunset range serve as unique cushion and surface protection. They offer ideal all-round protection for various products. The combination offers significant advantages over standard bubble wrap: greater puncture resistance; increased tear resistance; velvety-soft surface protection.

FULL PROTECTION

KRAFT PAPER LAMINATED BUBBLE WRAP FILM

TECHNICAL DETAILS

Bubble Diameter	10 mm Bubble	30 mm Bubble
Bubble Height	3,5 mm	10 mm
Micron	Between 10 to 300 µm	Between 100 to 350 µm
Width	Between 15 to 200 cm	Between 15 to 200 cm
Length	Between 3 to 250 meters	Between 3 to 250 meters
Kraft paper lamination Weight of paper: 60 g/m ²		
Weight of PE coating: 15g/m ²		
Please take contact with our sales team for the color of the paper.		

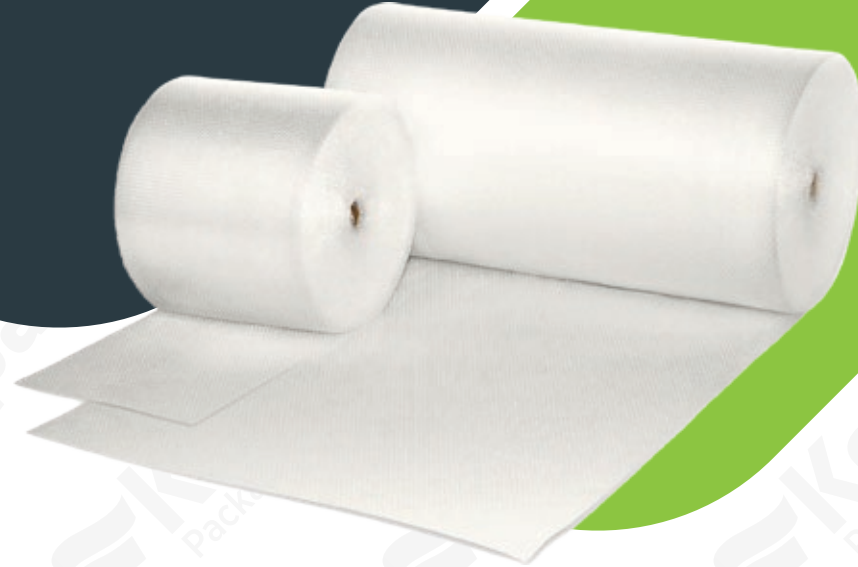

Kraft paper laminated bubble wrap, used in numerous industrial sectors, offers excellent resistance and cushioning properties. It offers the ideal protective cover for furniture and can be easily labeled yourself for product identification.

UV STABILIZED BUBBLE WRAP FILM

FULL PROTECTION

TECHNICAL DETAILS

	10 mm Bubble	30 mm Bubble
Bubble Diameter	10 mm Bubble	30 mm Bubble
Bubble Height	3,5 mm	10 mm
Micron	Between 10 to 300 µm	Between 100 to 350 µm
Width	Between 15 to 200 cm	Between 15 to 200 cm
Length	Between 3 to 250 meters	Between 3 to 250 meters

UV-stabilized bubble wrap offers the perfect solution for insulating and protecting products that are exposed to sunlight for long periods of time.

FULL PROTECTION

for safely transport...

PRINTED BUBBLE WRAP FILM

For applications in the advertising and security sector, printed adhesive tapes are laminated onto our bubble wrap according to customer requirements. Printed films are ideal for individual design and offer the ideal solution for company identification and product labeling.

TECHNICAL DETAILS

	10 mm Bubble	30 mm Bubble
Bubble Diameter	10 mm Bubble	30 mm Bubble
Bubble Height	3,5 mm	10 mm
Micron	Between 10 to 300 µm	Between 100 to 350 µm
Width	Between 15 to 200 cm	Between 15 to 200 cm
Length	Between 3 to 250 meters	Between 3 to 250 meters

ANTISTATIC BUBBLE WRAP FILM

FULL PROTECTION

TECHNICAL DETAILS

	10 mm Bubble	30 mm Bubble
Bubble Diameter	10 mm Bubble	30 mm Bubble
Bubble Height	3,5 mm	10 mm
Micron	Between 10 to 300 μ m	Between 100 to 350 μ m
Width	Between 15 to 200 cm	Between 15 to 200 cm
Length	Between 3 to 250 meters	Between 3 to 250 meters

Used primarily in the electronics industry, this additive protects high-value items, such as electronic components such as semiconductors and circuit boards, from electrostatic charge and provides cushioning and protection during transport and storage.

FULL PROTECTION

FIRE CLASSES B1 OR B2 BUBBLE WRAP FILM

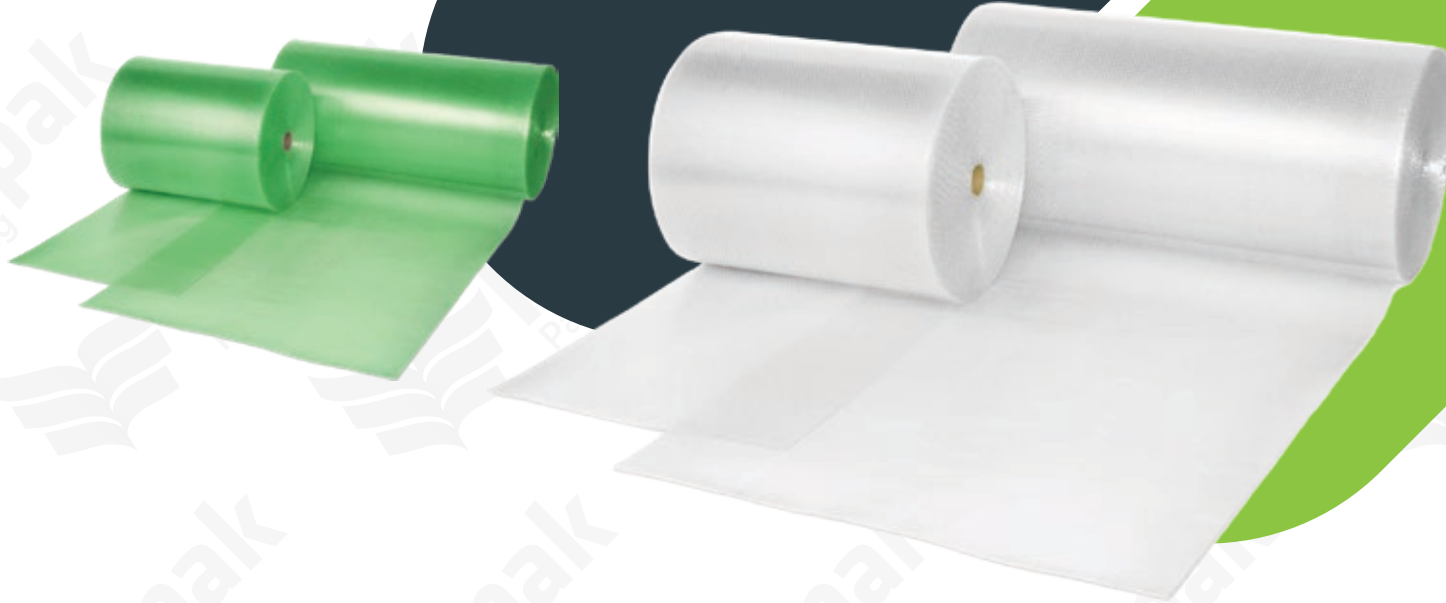

The flame-retardant bubble wrap offers the perfect solution for insulating and protecting products in conjunction with increased flame retardancy.

TECHNICAL DETAILS

	10 mm Bubble	30 mm Bubble
Bubble Diameter	10 mm Bubble	30 mm Bubble
Bubble Height	3,5 mm	10 mm
Micron	Between 10 to 300 µm	Between 100 to 350 µm
Width	Between 15 to 200 cm	Between 15 to 200 cm
Length	Between 3 to 250 meters	Between 3 to 250 meters

SELF-ADHESIVE BUBBLE WRAP FILM

FULL PROTECTION

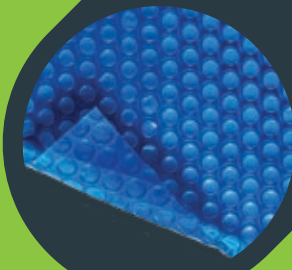

TECHNICAL DETAILS

	10 mm Bubble	30 mm Bubble
Bubble Diameter	10 mm Bubble	30 mm Bubble
Bubble Height	3,5 mm	10 mm
Micron	Between 10 to 300 µm	Between 100 to 350 µm
Width	Between 15 to 200 cm	Between 15 to 200 cm
Length	Between 3 to 250 meters	Between 3 to 250 meters

Self-adhesive bubble wrap is mainly used in the automotive and glazing industries. Self-adhesive bubble wrap provides the best protection for vehicle bodies, window panes and furniture during manufacturing, transportation and storage.

FULL PROTECTION

SWIMMING POOL LINER

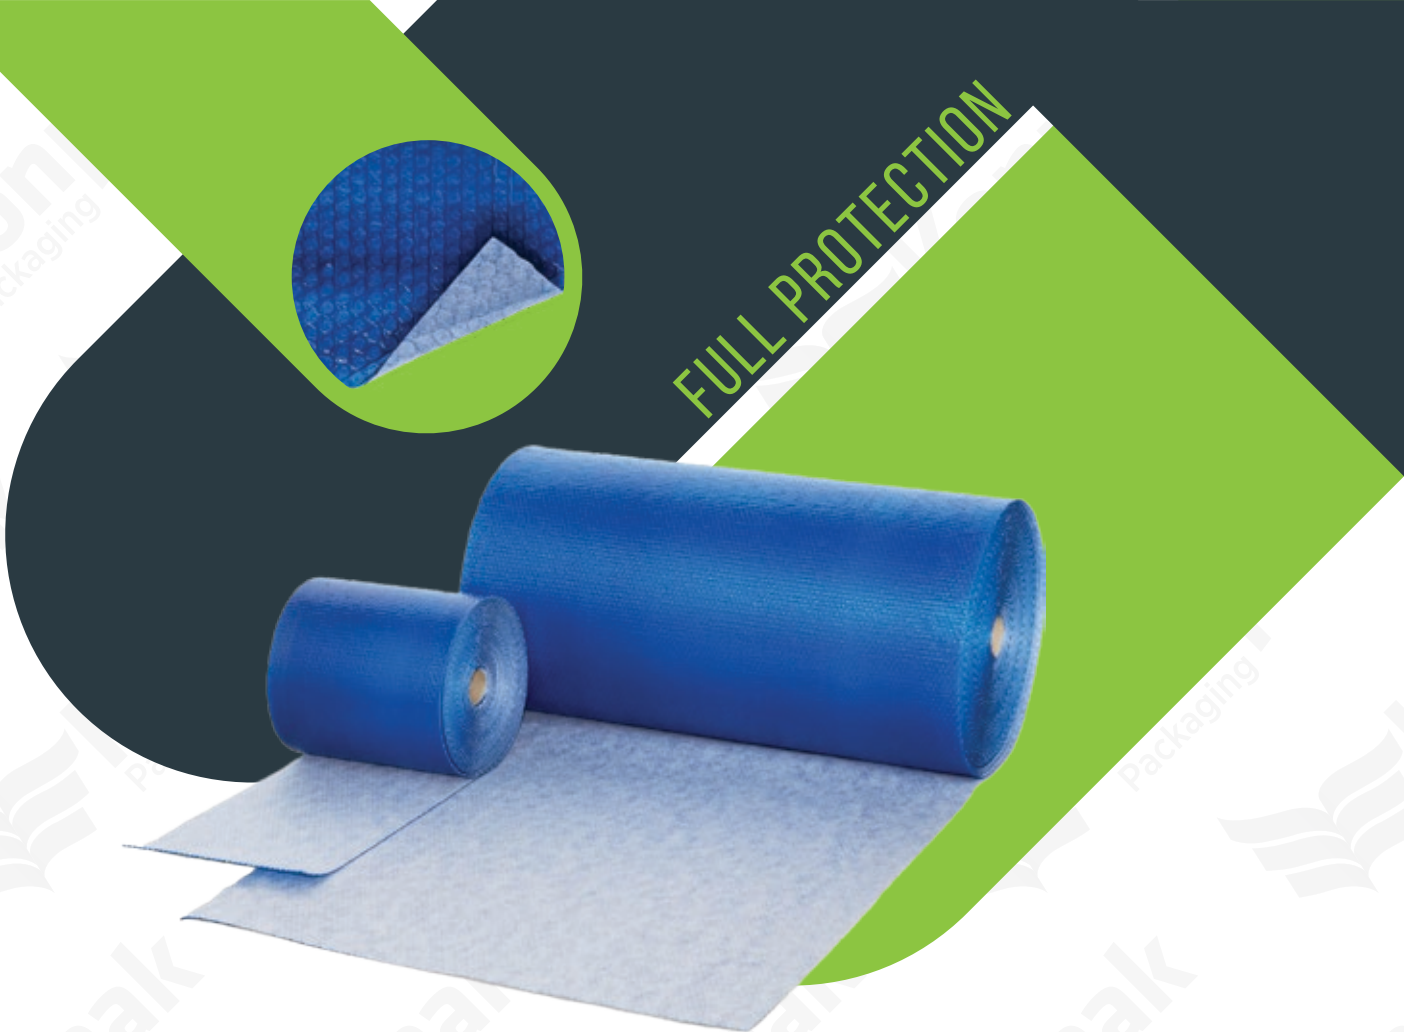

Bubble wrap is one of the best thermal insulation materials. The bubble wrap insulates the cold and thus achieves a higher heat value. Furthermore, the film can reduce algae formation.

TECHNICAL DETAILS

Bubble Diameter	10 mm Bubble	30 mm Bubble
Bubble Height	3,5 mm	10 mm
Micron	Between 10 to 300 µm	Between 100 to 350 µm
Width	Between 15 to 200 cm	Between 15 to 200 cm
Length	Between 3 to 250 meters	Between 3 to 250 meters

NON WOVEN BUBBLE WRAP FILM

FULL PROTECTION

TECHNICAL DETAILS

	10 mm Bubble	30 mm Bubble
Bubble Diameter	10 mm Bubble	30 mm Bubble
Bubble Height	3,5 mm	10 mm
Micron	Between 10 to 300 μ m	Between 100 to 350 μ m
Width	Between 15 to 200 cm	Between 15 to 200 cm
Length	Between 3 to 250 meters	Between 3 to 250 meters

This product combines the advantages of a velvety-soft fleece with the excellent protective effect of our bubble wrap. The combination offers significant advantages over standard bubble wrap: greater puncture resistance; increased tear resistance; moisture absorption; velvety-soft surface protection.

FULL PROTECTION

transport...

POLYETHYLENE FOAM SHEET

Our solutions with foam films are made from uncrosslinked CFC/HCFC-free foamed films made of polyethylene (PE-LD). In order to meet special technical requirements, PE foam films can be equipped with flame retardants, UV stabilizers and antistatic agents. On request and for certain quantities, PE foam can also be colored if desired.

TECHNICAL DETAILS

Thickness of the film	: 1.0 / 1.5 / 2.0 / 3.0 / 4.0 / 5.0
Bulk density (kg/m ³)	: approx. 20-22
Fire behavior (class)	: B3
Additional information	: In order to meet special technical requirements, PE foam films can be equipped with flame retardants, UV stabilizers and antistatic agents (minimum quantities on request).
